

How to set up a Twitter Page

1. Go to this link <https://twitter.com> and you will be taken to the following page:
2. Enter your name, email and a password into the fields of the 'Sign up' box.

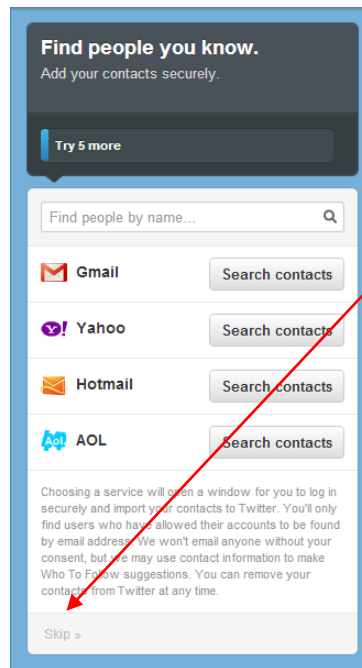

3. Then, select the yellow 'Sign up for Twitter' button.
4. Next, fill in all the required fields with your details and choose a 'username' – this must be less than 15 characters and can be changed at any time. Try and make this related to your business.

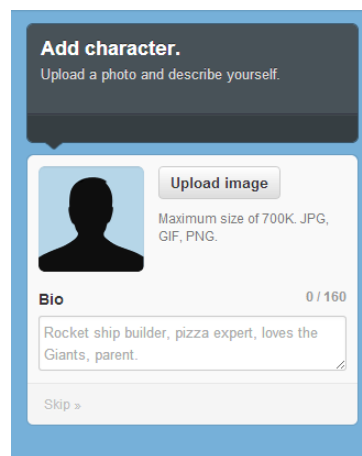

5. Select the yellow 'Create my account' button.
6. After the welcome page, you will be asked to set up your 'home page' by following a series of steps:
 - Select 5 people to follow (you can 'unfollow' them later if you wish).
 - Select 5 more people to follow!

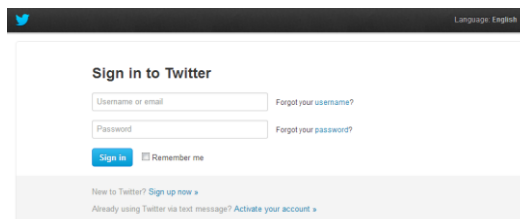

- Find people you know via email (you can move past this step by selecting the word 'Skip' on the bottom left-hand side of the page). This can be done later if you want to use this function.

- Add a photo and description of yourself (again, you can skip this step if you wish).

7. You will then be sent a confirmation e-mail. You will be asked to click on the button or the link and will be asked to sign into Twitter using your email and password.

8. To log back into your Twitter page go to <https://twitter.com> and type in your e-mail and password ... and you're ready to Tweet!
